

# Francesco Fava

Software Developer

## About me

I'm a results-driven software developer with over 3 years of experience building scalable web applications and solutions that simplify processes. I specialize in React and TypeScript on the frontend, while leveraging Node.js and MongoDB for backend systems. Passionate about solving challenges through technology, I thrive in collaborative environments and consistently deliver user-focused solutions. Recently, I led the development of a platform that connects event organizers with providers of venues, catering, and other services to streamline the event planning process.
